

Carelift

FEDERAL
ELEVATOR

About Federal Elevator

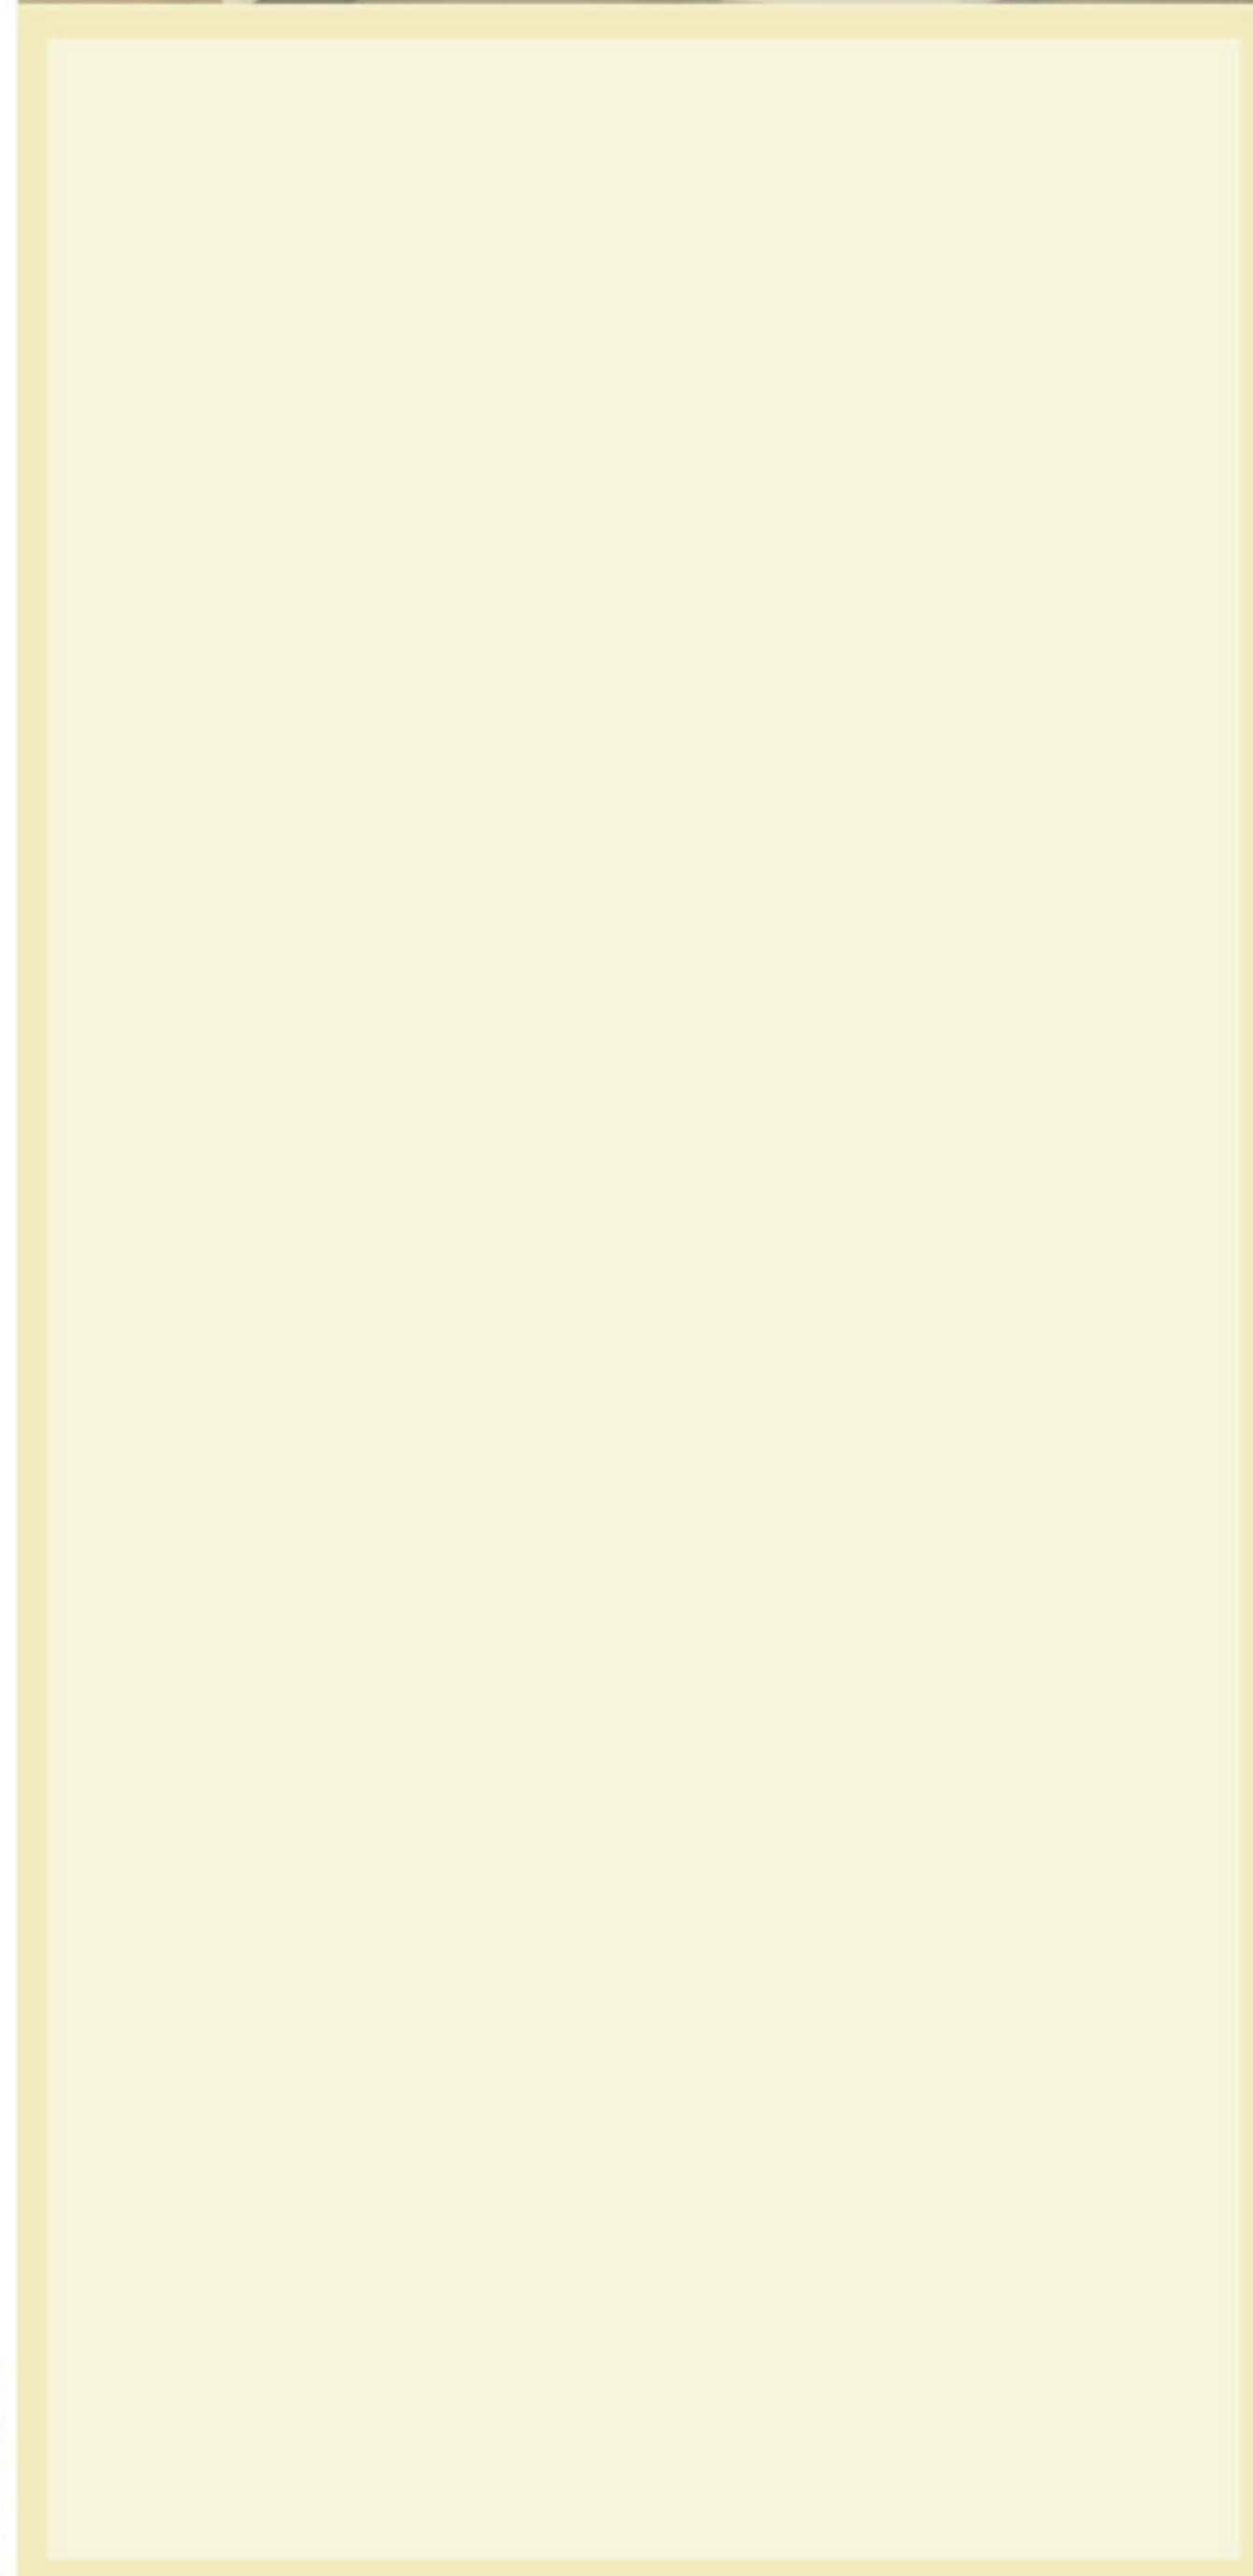

Federal Elevator was created in 1988 with a mandate to produce high quality lifts and elevators at competitive prices. More than 20 years later we have thousands of installations across North America and worldwide - keeping true to our promise and vision.

The Carelift is our standard Public Building lift model. It has standard capacity of 1000lbs with an operating speed up to 30 fpm in both directions. The pump and controller can be accommodated inside a small space. The Carelift can be completely custom designed to suit specific building requirements.

This commercial lift is the perfect solution for multilevel buildings. Designed for the customer with a multitude of premium features, finishes, and color options. Delivering quiet, smooth, dependable operation day in and day out.

Wheelchair Lifts

The Carelift Wheelchair Lift is a fully enclosed commercial application lift that can provide access to all levels of your building up to 6 different floors. The Carelift can be installed in a new or existing building and requires only an 8" pit and 96" of overhead space. A large selection of cab wall finishes are available to make it fit any decor. Manual or automatic swing doors are available. The Carelift is the ideal multilevel accessibility solution for any building.
